1

Garage Door
WHITE

2

Garage Door
SAME COLOR AS TRIM

3

Garage Door
**SAME COLOR AS BODY
WHEN GARAGE AND BODY
ARE DIVIDED BY
SUFFICIENT AMOUNT OF TRIM**

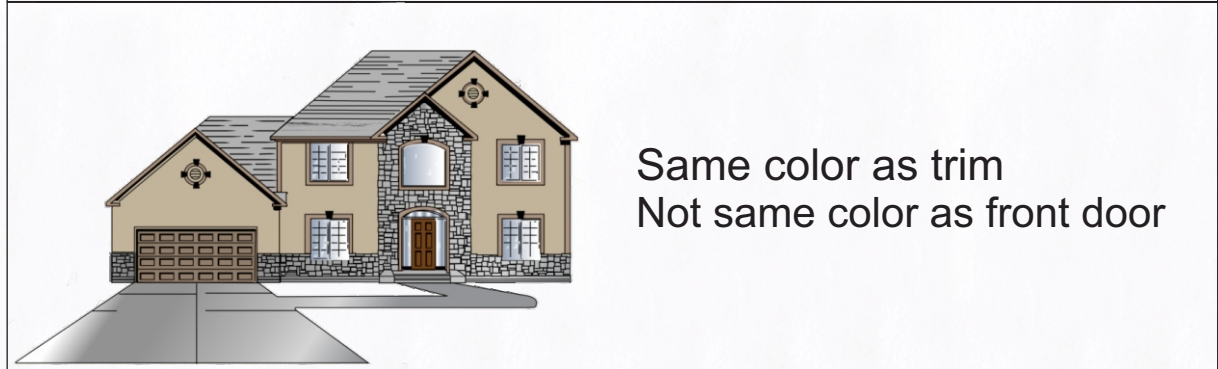

GARAGE DOOR PAINT OPTIONS

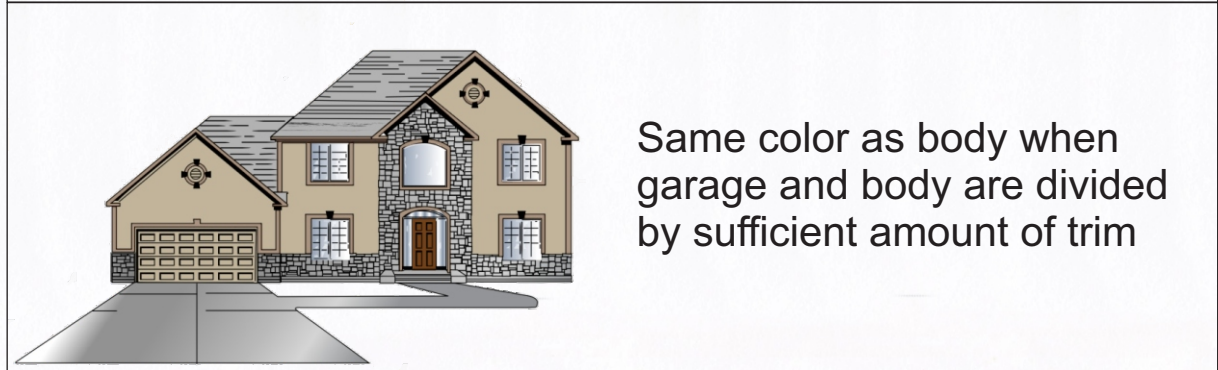

JOHN'S LANDING HOA

White

Same color as trim
Not same color as front door

Same color as body when
garage and body are divided
by sufficient amount of trim

Note: The colors displayed are actual paint samples of the colors applied to the home. However these samples are subject to the effects of age, temperature, and other factors beyond our control. The human eye's perception of these colors when applied to the home can vary due to surface texture of the substrate, product gloss, application method, lighting, and reflections.

GARAGE DOOR IS NOT TO BE PAINTED THE SAME COLOR AS THE FRONT DOOR

THE ULTIMATE HIGH-BUILD MASONRY COATING SYSTEM

ONE SYSTEM, TWICE

Guard Against Wind-Driven Rain and Alkali Burn

Flex Lox Exterior Coating is a superior, high-build paint system preferred by the finest builders, general contractors, architects, property maintenance and painting professionals. The exceptional blend of premium 100% acrylic resins enables Flex Lox to protect against wind-driven rain and alkali burn all in one easy to use system.

Flex Lox provides the durability and flexibility to bridge hairline cracks in masonry and stucco, acting as a barrier between wind-driven rain while still allowing the moisture vapor inside the building to escape. It also offers a high level of resistance to alkali burn and efflorescence allowing application to hot stucco where other coatings would fail.* Flex Lox may be used independently as either a primer coat or a finish coat, but performs ideally when used as a two-coat primer/finish system. The Flex Lox System has excellent color retention and is highly resistant to chalking and mildew growth. Flex Lox is the ideal choice for both new construction and repainting existing structures.

Whether subjected to wind-driven rain, intense sun, high heat and humidity, or salt air, Flex Lox forms a protective shield for your stucco and masonry surfaces. When you choose Flex Lox for your exterior painting projects, you can expect a long lasting and beautiful finish every time.

THE PROTECTION

Alkali Burn with Flex Lox from Color Wheel.

BENEFITS OF FLEX LOX EXTERIOR COATING SYSTEM

- Exceeds federal specification standard for resistance to wind-driven rain at 98 mph wind velocity: TTC-555B section 3.3.3, ASTM D6904
- Extremely durable and flexible
- Allows moisture vapor transmission ASTM-E96-80
- Excellent resistance to chalking, fading and organic growth (mildew)
- Meets federal specification standards for paint: TTP-19D, TTP-96D
- May be used as a primer as well as a finish coat
- Easy to apply, high-build formulation for excellent coverage
- May be applied to fresh stucco and concrete*
- Bridges hairline masonry cracks
- Excellent for use on both new and existing structures

MAY BE APPLIED TO PROPERLY PREPARED:

- Concrete Block & Masonry Stucco
- Poured & Precast Concrete
- Synthetic Masonry Stucco (EIFS)
- Cementitious Siding
- Wood
- Aluminum & Galvanized Metals

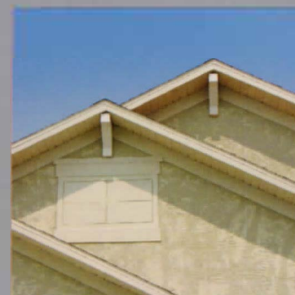

HOW THE FLEX LOX SYSTEM WORKS

The Flex Lox System allows the paint to expand and contract, or flex, with the underlying structure, creating a protective film to guard walls against wind-driven rain. It also allows the structure to breathe, enabling moisture vapor to escape without sacrificing the integrity of the paint film.

Resistant to Wind-Driven Rain

Guards Against Alkali Burn

Bridges Hairline Cracks

Available in Thousands of Colors

*Allow a minimum of three days of cure time for new masonry, a seven day cure time for poured in place concrete and a pH level of 13 or lower prior to application of product.

PAINTS THAT WEATHER THE SUNSHINE STATE

Sun, wind, heat, humidity and salt air... Florida builders are challenged to select materials that withstand Florida's unique and harsh environment. Since 1960, Color Wheel has been the leader in providing paint products designed for use in new home construction.

Unlike national manufacturers who make products for use across the entire nation, Florida-based Color Wheel formulates paints specifically to weather Florida's demanding climate.

FLORIDA'S MOST DURABLE EXTERIOR PAINT

Color Wheel regularly compares the durability of its exterior paints against similarly-priced national brands, using ASTM test panels exposed to Florida's sun and humidity.

The results: National brands fade and mildew long before Florida-proven Color Wheel products.

FLORIDA'S MOST WASHABLE INTERIOR PAINT

Using ASTM-approved testing methods, Color Wheel compares its paints to leading national brands for "scrubability"

The results: Color Wheel scrubs better than national brands, giving you a surface that cleans up easier.

WHEN YOUR HOME IS PAINTED WITH COLOR WHEEL, YOU GET...

Painted Perfect Touch-Up Kit which includes interior paint and other home repair items.

Product Information Guide to help you keep track of the products and colors used in your new home.

Lifetime Discount Card offers you Florida's best paints at tremendous discounts off retail price.

Free, Same-Day Delivery Service to your doorstep-regardless of quantity purchased.

ABOUT COLOR WHEEL PAINTS & COATINGS...

When brothers Don and Charlie Strube moved to Florida from Missouri in 1960 to begin a paint company, they had no idea what the future held in store. Still family owned and operated, Color Wheel has grown from a small two-room shop in Orlando to the largest privately held paint manufacturer based in Florida. From an eight acre state-of-the-art manufacturing and

distribution facility, over four million gallons of paint are produced per year.

The secret to Color Wheel's tremendous success is the ability to exceed the needs of both the homebuilder and homebuyer. Homebuilders need quality paint products designed to withstand Florida's harsh climate. They also need to feel secure in knowing that

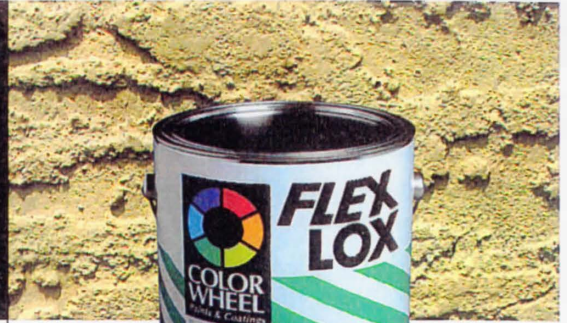

their homebuyers will be pleased with their paint long after they've moved in.

The Strube brothers never dreamed that their small firm would become what it is today, but with continued dedication to always provide top quality products that outperform those of our competitors, the future paints a very bright picture for Color Wheel.

EXTERIOR MASONRY COATING SYSTEM

SATISFIED FLEX LOX CUSTOMERS

Builders throughout the Southeast have switched to the Flex Lox System because of its superior ability to protect structures from water intrusion caused by wind-driven rain. Made with 100% acrylic resins, the Flex Lox System reduces water penetration by creating a durable and flexible barrier that expands to bridge hairline cracks while moving with the underlying substrate.

The Flex Lox system is ideal for use on single-family homes, multi-family units, commercial and industrial buildings.

CONSIDERATIONS AND APPLICATION REQUIREMENTS FOR EXTERIOR PAINTING OF A DWELLING UNIT

The Architectural Review Board (ARB) **must approve** all exterior painting of a dwelling unit **Before** painting begins. These considerations apply to painting of the body, trim, eaves (fascia, soffit) front door and garage door of the dwelling unit. Painting, extending, or widening of a driveway or fence also requires ARB approval and application should be made separate from that of the dwelling unit. Below are some considerations that will be taken into account by the ARB in the review

- A. Trends in colors change through the years. The current HOA board approved color palette may be reviewed at Color Wheel Paints @ 535 and Highway 50, or at the offices of the Management Company
- B. The palette contains a variety of body colors with specific choices of trim and door colors for each. Eave (fascia, soffit) colors and the alternate trim and door colors provided can be used in any of the color combinations. Colors **cannot be mixed and matched from page to page**. The only exception to this is the alternate trim and door colors located on the back page labeled "Alternate". These alternate Trims and Door colors may be substituted for any trim or door color on any of the (21) Color Schemes in the book.
- C. Application to re-paint a home in it's original, builder-approved, body , trim and door colors will be considered. Application must include proof of original color provided in homeowners contract.
- D. Paint Chips (Swatches) must be submitted when using the paint supplier indicated in the color palette book. In addition, if a vendor other than Color Wheel is to be used, Swatches must also be submitted from them to insure a color match.
- E. Garage door must be a solid color and can be painted:
 - 1) White
 - 2) Same color as trim: or,
 - 3) Same color as body when garage and house are divided by sufficient amount of trim
- F. Some colors and paint types may not be appropriate for all homes and the effects of strong sunlight and ultraviolet deterioration should be considered in making the appropriate choice
- G. A home cannot be painted the same as either of the homes adjacent.
- H. Homeowner must submit application and receive ARB approval **before** paintwork is to begin.
- J. Application to the ARB must include:
 - 1) A completed ARB submission form denoting proposed colors for the body, trim, eaves (fascia, soffit), front door and garage door.
 - 2) Proof of the original, builder approved colors provided in the contract when re-painting of the original color is requested.
 - 3) **Paint chips (Swatches) of proposed colors from Color Wheel, and if used, paint swatches from an alternate painting vendor.**
